ABOUT ME

Designing products people enjoy using.

I'm a UI/UX & Product Designer with 1.5+ years of experience crafting mobile apps, websites, and SaaS dashboards — currently designing at Vulcrux Systems, following a design internship at BlackHardStone. I care about clean systems, considered typography, and interfaces that feel effortless. This catalogue lays out exactly how I work and what each engagement costs, so we can start a project with clarity from day one.
